## DETAILED ACTION

### *Drawings*

1. The drawings were received on January 20, 2004. These drawings are acceptable.
2. Claims 1-23 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 1-23 are allowed because the closest prior art, Roberts et al. (US Patent Number 6,212,398) and Suda (US Patent Number 7,149,555), either singularly or in combination, fail to anticipate or render obvious for running a real-time operating system to load a plurality of control procedures used to operate the mobile device, wherein the procedures comprise a synchronous task and consequently the controller unit performs an executing the synchronous task for acquiring an interruption of other control procedures presently loaded by the real-time operation system and using the synchronous task to determine a predestined sleep period for each sleep mode that is being used to bring to a halt the first clock signal from driving the micro-processor controller device, wherein the usage of the micro-controller device executes the synchronous task for driving the mobile device to halt the first clock signaling from driving the microprocessor device during actual sleep mode and controlling the timing generator to synchronize timing of the mobile device with timing of the base station in accordance to the actual sleep period, and wherein the controller unit assigns a first priority to the synchronous task among the control procedures, which does not correspond to a lowest priority, and

using the controller to calculate a predetermined sleep period for a sleep mode that is used to halt the primary clock signal from driving the micro-controller.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
